

Fire and Security Solutions

Maximise fire safety investments,
intuitive actionable information

Honeywell eVance™ Facility Manager

Buildings today are holistic systems that are the cornerstone of your business. Your Honeywell Notifier™ fire panel is part of this technology eco-system managed by facility managers. With multiple data-sources, disparate processes and daily operational challenges, having the information to reduce fire safety risk, maintenance costs and achieve better business outcomes is challenging. Until now.

Intuitive actionable information

eVance Facility Manager will change the way you manage your fire systems by presenting both big picture and granular device-focused data in multiple graphic-driven, easy-to-understand formats. With access to a portfolio of automated digital reports, including fault handling, testing and replacement reports, or custom reports, eVance provides you with the information to:

- **Track** fire system effectiveness
- **Identify** fire safety risks earlier
- **Perform** predictive maintenance
- **Optimise** device inventory
- **Analyse** system performance allowing you to be confident you are using your fire system to its fullest potential

Intelligent reporting at your fingertips

Simple and user-friendly tools

Simplify every-day tasks, promote productivity and time-savings by utilizing eVance's simple and user-friendly tools.

Dashboards, as wider awareness creates bigger impact

eVance dashboards provide facility-wide analysis, insights of system health and event lists, in a simple and visual display. This real-time intelligent aggregation of data from multiple fire panels empowers facility managers with a holistic view, across multiple buildings and multiple floors to identify variances and abnormalities fast, reducing manual processes and duplication of processes.

Mobile access, promoting productivity and responsiveness

Whether you're an HSE director or a facility manager, you can use a smartphone or tablet device for 24/7 remote access for greater situational awareness on-the-go, promoting productivity and peace-of-mind.

Use mobile devices for preventative maintenance and automatic diagnostic alerts, enabling faster resolution of potential issues before major challenges occur.

Dashboards keep life safety front-of-mind

Introducing Honeywell eVance™ Facility Manager

eVance Facility Manager transforms complex and disparate fire panel data into intuitive visualisations and actionable insights. Seamlessly integrated with your Honeywell Notifier™ fire panel using cloud-based, software-as-a-service (SaaS)

technologies, facility managers can cultivate greater returns from existing infrastructure investments and promote visibly better business outcomes by reducing risk, maintenance costs and increasing operational efficiencies.

Cultivate greater returns from your existing investment with Honeywell eVance

Increase operational efficiencies and reduce operational costs

With actionable information at your fingertips, eVance empowers facility managers to automate processes, reduce human-error and increase operational efficiencies.

Promote accurate and efficient maintenance

Servicing your fire system is a cost of doing business, however with eVance Facility Manager you can increase maintenance accuracy and efficiency promoting reduced cost. Pin-point issues and underlying abnormalities and be confident that maintenance checks go beyond superficial indicators thus, allowing you to optimise your system performance.

Resource optimisation

eVance empowers facility managers to make better decisions on where they dedicate their time and resources. Now it is easier to increase operational savings through more efficient resource deployment, reduced fault-detection times and simplified training.

Low cost, high performance

Leveraging cloud-based SaaS technologies, eVance makes the necessary connections while keeping costs low and performance and security high. Additionally, eVance has the scalability and flexibility to expand as your facility grows.

With eVance Facility Manager you don't just get more information, you get the insights to drive actionable improvements and achieve bottom-line savings.

Be confident, reduce risk and promote compliance

With the powerful combination of eVance Facility Manager and your existing Honeywell Notifier fire systems, you can be confident your facility is protected with a compliant and robust fire system, reducing risk, protecting people and promoting business continuity.

Compliance counts

Introducing standardised digital reports, reducing human-error and reliance on manual paper-based processes, eVance makes it easier to demonstrate compliance with industry requirements reducing audit preparation time, risk of HSE issues and potential legal penalties.

Proven track record

With over 100 years of building automation experience, highest accreditations in software engineering and the latest in user-experience methodology, you can be confident that Honeywell eVance maximises your fire safety to investments with intuitive actionable information.

For over 60 years, NOTIFIER has been a leader in the fire alarm industry. Today, we are the largest manufacturer of engineered fire alarm systems with over 400 distributors worldwide, and regional support operations on every continent for the flexibility and options your business needs.

NOTIFIER - Leaders in Life. Safety. Technology.
